

AIRMAX® NASAL DILATOR

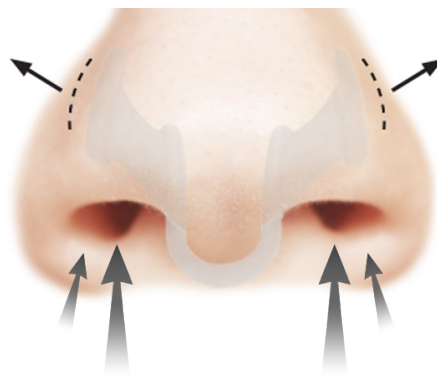

- The AIRMAX® Nasal Dilator, from the makers of Mack's®, is a specially designed nasal dilator that helps users breathe more freely through their nose
- A simple, natural solution for individuals who have sleeping and breathing difficulties
- Designed to be comfortably placed inside the nasal passages, its patented, aerodynamic "winged" design helps improve airflow by expanding the narrowest parts of the nasal passages to allow increased airflow for better breathing (US PATENT D 540,462)
- Clinically proven to optimize airflow through the nasal passages by up to 76.1% (peak nasal inspiratory flow - PNIF) resulting in increased oxygen levels in the lungs
- Clinically proven to help reduce snoring and mild sleep apnea, and to relieve nasal congestion; performs 3.6x better than Breathe Right® Nasal Strips
- An FDA cleared medical device made of hypoallergenic, medical grade material that is soft, flexible and comfortable
- Designed for comfort - won't scratch the inside of your nose
- Available in medium (fits most) and small, and includes storage case for proper hygiene
