

MACK'S[®]

Leading & innovating for over
60 years

MACK'S®

LEADING AND INNOVATING FOR OVER 60 YEARS

In 1962 Raymond Benner, an accomplished symphony musician, and his wife Cecilia, liked the thought of a challenge, and a deal was struck to purchase the company, McKeon Products, Inc. There was only one product, an earplug made of a moldable clay mixture. The product was called Mack's® Earplugs - the brand named after the previous owner. Mr. Benner was happy with the earplugs, but believed they could be improved. He wanted to make the earplugs more comfortable - a product attribute that would increase wearability. Through much trial and error, as well as different production techniques, he discovered a very unique substance that became the world's first moldable silicone earplug. Benner was enthusiastic about the potential to help improve the lives of many people with his new invention. Struck by the distinctive appearance of the new earplugs, which looked and felt much like little white pillows, Benner changed the name to Mack's® Pillow Soft® Earplugs. As Benner's then small family business grew, it moved from his home's basement through eight ever-expanding facilities.

McKeon Products now offers a full range of innovative health care products for a variety of uses. The company is still family owned and operated. Raymond Benner's sons, Devin Benner, now CEO, and Pete Benner, continue in their father's footsteps at McKeon by keeping a hands-on approach to product research and development.

The business that started as a side interest for the Benners, has evolved into the leader of the retail ear care industry. Mack's® is still the #1-selling and #1 Doctor recommended earplug brand in the USA*, and celebrated its 60th anniversary in 2022.

FAMILY OWNED AMERICAN MANUFACTURING

McKeon Products utilizes an ISO 9001:2015 Quality Management System certified by TUV USA and operates solely out of its state-of-the-art facility in Michigan. McKeon continues to grow by providing the highest quality, innovative products in the marketplace that are now sold worldwide.

DOCTOR RECOMMENDED

FUN MOMENTS IN MACK'S® HISTORY

"I'm in the studio a lot and also a full-time mom. It's important for me to nap, so often I'll find a safe place to park, lock my doors and put my Mack's® Earplugs in."
Lisa Loeb, "WHAT'S IN MY BAG?" (US Weekly Magazine)

Pedro Ordenes, who holds the world record for the most "escape" swims from Alcatraz, recommends and uses Mack's® Earplugs exclusively

Mack's® Becomes The #1 Doctor Recommended Brand of Earplugs Overall - Business Research Group 2019

Mack's® Earplugs were the first earplugs used in a World Series baseball game

Masters swimmer, Lois Nochman, broke 18 world records while using Mack's® Earplugs to help prevent swimmer's ear

Mack's® Earplugs are the Official Ear Care of USA Swimming®

Laura Sophiea, Ironman veteran with 34 total races under her belt, uses Mack's® Earplugs to seal out water at race time

THE WORLD'S FIRST MOLDABLE SILICONE EARPLUG

Invented in 1962 by Mack's® owner, Raymond Benner, Mack's® Pillow Soft® silicone waterproof earplugs are the first ever made. As an avid swimmer, Mr. Benner thought, a stickier and more malleable substance would better seal out water, thus preventing water-dogged ears and "swimmer's ear."

ENHANCEMENT**

Item #6060
Hearing Muffs

- A MACK'S® FIRST: ELECTRONIC HEARING PROTECTION EARMUFFS WITH HEARING ENHANCEMENT
- Triple Action™ Technology – offers triple benefits of hearing enhancement (hear ambient sound and communicate with those around you), hearing protection (protect from loud noise), and Bluetooth® Wireless Technology (stream music and have phone conversations) all in one earmuff!
- Omnidirectional Hi-Fi microphones for enhanced ambient sound amplification, and HD speakers for clear, balanced sound allow you to hear and talk with friends, parents and co-workers as well as hear surrounding environmental sounds for a safer listening experience
- Full Auto™ Noise Compression suppresses ambient sound to a safe level in 0.01 second when harmful noise is detected; the sound-activated compression technology helps protect your hearing by suppressing dangerous noise over 82 dB
- Stay connected wirelessly with Bluetooth® Wireless Technology by pairing your earmuffs with your cell phones, laptops and tablets so you can listen to music and podcasts, as well as make and receive phone calls
- Slim, low-profile, lightweight design. The ultra soft cushioned ear pads and adjustable headband provide a snug fit and all-day comfort. Foldable for compact storage
- Listen to phone calls, music, etc. via auxiliary jack (3.5 mm audio input cable included) Includes 2 AAA Duracell® batteries and storage bag for earmuffs
- Great for music streaming, video conferencing, power tools, loud events, etc.
- Noise Reduction Rating – 21 decibels
